ABOUT ME

Software Engineer with 8+ years of experience building custom platforms, automation systems, and revenue-driven software for international companies. Owned end-to-end development of Shopify-integrated CRM systems and automated trading solutions, contributing to business growth from $200K to $600K annual revenue and $30K+ in first-month product revenue.

WORK EXPERIENCE

Senior Software Engineer / Product Engineer
Oct 2023 - Present

Clutch Hair Culture • Remote (Kansas, USA)

- Designed and built a custom CRM platform from scratch, tightly integrated with Shopify, to manage operations, customers, orders, and internal workflows.
- Developed and customized the Shopify storefront and theme, improving UX, performance, and conversion.
- Implemented end-to-end automation across sales, order processing, customer management, and internal operations.
- Built custom business tools and workflows tailored to company needs, replacing manual processes with scalable systems.
- Contributed directly to business growth, supporting revenue scaling from ~$200K/year to ~$600K/year.

Freelance Software Engineer (Automation / Backend)
Jan 2019 - Present

Upwork & Fiverr • Remote

- Delivered custom backend systems, automation tools, bots, for international clients.
- Built real-time monitoring tools, data extraction systems, and API integrations.
- Developed multi-process Python applications for performance-critical tasks.
- Managed full project lifecycles from requirements to delivery.

Software Engineer – Automation & Trading Systems
Jun 2022 - Nov 2022

BottingEmpire.com • Remote (Germany)

- Conceived, designed, and developed a fully automated trading system for buying and selling digital game items across online marketplaces.
- Delivered a production system that generated $30K+ in revenue in the first month.
- Built backend services to interact with external marketplaces (e.g. D2Gate), handling pricing logic, transactions, and inventory flow.

Software Developer (Full-Stack)
Mar 2023 - Jun 2023

Poise Golf LLP • Remote

- Built a full-stack golf trainer management platform enabling lesson scheduling, payments, student communication, and performance tracking.
